

Seafloor™ datasheet

The HyDrone™ is a one-man portable, catamaran platform developed for hydrographic survey applications. Working in conjunction with the HydroLite™ portable echosounder kit, the HyDrone™ accomplishes the same results as more expensive RC survey systems. The lightweight, wide profile and watertight construction provide stability, ruggedness and portability. It is manufactured from high quality marine materials and components and easily disassembles for transport and shipping.

Work environments include mines, sewage treatment plants, lakes, settlement ponds, harbors and rivers.

Remote control of the survey boat is easy using a high-power remote control system that offers up to 2km range, with a survey endurance of over 8 hours at a survey speed of 3 knots on a single battery pack.

Lightweight and portable

Power differential thrusters for maneuverability

With our AutoNav option, the HyDrone™ is also semi autonomous; the vehicle can be monitored while under way, in both Auto and Manual modes.

The mission planner app runs on a base station laptop connected through a radio telemetry link, and displays the vehicle's graphical position and progress in real time against a background map of the survey area. Battery, voltage, current, and capacity remaining is monitored via this link.

Rev. April 16, 2019

HyDrone™ Unmanned Surface Vehicle

HyDrone™ ASV with HydroLite echosounder, Trimble antenna and Trimble data collector

- ▶ *Remote Controlled or Autonomous*
- ▶ *Wide profile for stability*
- ▶ *Watertight, durable construction*
- ▶ *Easy disassembly for transport and shipping*
- ▶ *Competitive pricing*
- ▶ *Optional Auto Pilot module*

HyDrone™ RCV

Seafloor™ datasheet

HyDrone™ Unmanned Surface Vehicle

Specifications

Typical Survey Speed.....	1 kn
Top Speed.....	4 kn
Hull Length.....	116 cm / 45.6 in
Hull Width.....	21cm / 8.2 in
Battery Endurance.....	8 hours at Survey Speed
Payload.....	35 lbs / 15 kg
Power.....	2x 14.8 vdc 16 Ah battery LiPo
ECU (Electronic Controller Unit).....	2x 120 amp
Motor.....	2x Brushless Thruster
Hull Material.....	UV Resistant HDPE
Frame.....	Aluminum Powder Coated
Steering.....	Differential Thrust
Empty Hull Weight & Batteries.....	9.8 kg / 25 lbs
Hardware.....	Stainless Steel
Hatches.....	4 x 7" Twist-Out Watertight Closure
R/C.....	RCU 2.4 GHz long range
Remote Range.....	Up to 2 km

Compatibility:

- ▶ Hypack
- ▶ Carlson
- ▶ EPOCH
- ▶ Leica
- ▶ Sokkia
- ▶ Topcon
- ▶ Trimble

Hydrolite-TM™ with Trimble GPS and data collector

Instrumentation Options

RTK GPS

Radio Telemetry

Hydrolite-TM™

*Hydrolite Pole Kit
SonarMite MILSpec Echosounder
Rugged Shipping Case*

Hydrolite-DFX™

Dual Frequency Echosounder 200/ 30 KHz

Auto Pilot Module

*AutoNav Control System
Embedded GPS and Compass
Built-In Telemetry System*

PC Laptop

*Mission Planner Application
USB Radio Telemetry*

AutoNav™ Control System

HyDrone™ ASV with Trimble SPS 585 and TSC3

Mission Planner application installed on a PC laptop showing preplanned survey

Survey data overlaid on Google Satellite Image (Mission Planner)
