

Leica iCON grade Intelligent System for Wheel Loaders

icon
intelligent construction

Experience the unique benefits of Leica iCON iGW3 machine control now in your wheel loader! Get your earthworks jobs done faster and right the first time. Save time and money by reducing rework and eliminating over excavation and grade checking.

Benefits

- Maximise your machine utilisation and return on investment from day one – get the grade right from the start
- Eliminate over excavation and costly material overruns
- Operator-friendly user interface reduces training time and cost
- Intuitive user interface provides additional confidence and high productivity
- Reduces labour costs by decreasing or eliminating grade checks
- Leica Geosystems' unique PowerSnap functionality allows rapid interchange of control panels between machines
- Full support of iCON telematics services

Leica iCON grade

Increase efficiency in earthworks

PowerSnap – Providing a new level of flexibility and user convenience

- System is up and running in no time
- Rapid interchange of control panels between machines, giving you extra flexibility on site
- One PowerSnap cradle for all iCON excavate and iCON grade panels
- Easy removal of core components for overnight security
- Contact and cable free connection to control panel
- Safety shut down feature protects system and data
- Unique patented snap on/snap off capability
